

Strapping the Scombi roof bag to your vehicle (using grip hooks or your roof rails)

1. Place your empty Scombi roof bag* on the roof of your car so that the zipper faces towards the rear of the vehicle, and position it evenly on both sides.
2. Pack your bag with all your stuff – just look how much fits inside!** We suggest you position the heavier items towards the sides of the roof, and the lighter items in the middle.
3. When the bag is all packed, zip it closed and secure it with the safety pin provided, or use your own lock.
4. Use the extra luggage loops on top of the bag to secure larger items, such as surf boards, fishing rods, or skis.
5. Now thread each of the 4 main tie-down straps (or holding straps) through each of the loops of the 4 grip hooks, or through your roof rails if you have them, then clip each strap to its top buckle – press it in until you hear the ‘click’ so you know it’s closed.
6. Next, tighten the main tie-down straps in the following order to secure the bag to the roof: First tighten the front straps, left and right. Then, tighten the rear straps, left and right.
7. Finally, click the 6 short tightening straps into their buckles and tighten them as well. There are 2 at the front, 2 at the rear, and 1 in the middle of each side. All of the have Velcro ends, so you can secure them to prevent flapping and noise during your drive.

That’s it - you’re good to go! Have a great trip!!

* You can load your bag first, and then lift it onto the roof of your vehicle, but we recommend loading the bag after placing it on the roof. This way, you won’t have to lift up a heavy bag, and your stuff won’t shift around inside while you’re lifting. Remember the non-slip pad? It’s harder to position the bag on the roof when it’s already packed full.

** The Scombi tie-down straps have been designed to withstand emergency stops at 130kg loads. However, we highly recommend you limit your cargo loads to between 60kg and 90kg, depending on your vehicle, and to place the heavier items at the sides of the roof rather than the center.
